

LUTW
POWERING OPPORTUNITY

It has been a busy Fall at LUTW with lots of exciting projects on the go. We would like to thank our amazing partners who worked with us over the past quarter to help make access to electricity a reality for families in our project areas. A big thank you to TransAlta, Enbridge and Rawls College of Business at Texas Tech University for not only providing financial support, but sending teams of passionate and talented volunteers our way to make it all happen.

We also ran our second Off-grid training program in Peru installing a solar PV system that will provide back-up power for a clinic in Pomacocha, Peru. The system will provide lighting, charge laptops and provide back-up power for the vaccine fridge for up to 36 hours when there's a power outage. If you're interested in a unique learning experience, stay tuned for our 2017 dates coming soon!

Last but not least, we are gearing up for our second annual [Dinner in the Dark](#) on November 24th at TELUS Spark. We've got lots of great auction items and a really fun night planned. Click through below to get your tickets and help us reach more people living in energy poverty.

We look forward to seeing you there!

Dinner in the Dark

An evening benefiting families living in energy poverty
