

LUTW
POWERING OPPORTUNITY

Join us on Saturday, January 31st for an Introduction to Solar Technology workshop hosted by [Light Up The World \(LUTW\)](#)

What will I learn?

The workshop will serve as an introduction to the basics of solar photovoltaic (PV) technology with a specific focus on small, off-grid systems similar to those that LUTW designs and installs in remote communities. The workshop will cover solar energy principles, system capacity and components. Participants will leave with a practical understanding of how solar PV technology works and what goes into a system. Please note, the workshop does not focus on grid-tie systems.

Why should I attend?

This is an opportunity for anyone without a technical background to learn about solar PV technology in a fun and approachable environment. If you are affiliated with a non-profit working abroad and considering whether using solar PV may be suitable, this workshop will help you become more familiar with the technology and explore its capacity to complement existing programs.

Registration fee and deadline:

The workshop cost is \$45 for adults and \$25 for students. All proceeds will go to support LUTW's program activities. The registration deadline is January 10th. For more information or to register please contact us at c.schultz@lutw.org or call us at 403-266-5004.

Date, time and location:

Date: Saturday, January 31st, 2015

Time: 9 am to 12 pm

Location: 224 13th Avenue S.W.
